

Please reject the NAB's petition 04-160 and oppose HR 4026. Support XM radio. XM radio is broadcasting at its best. We are paying for a service and we should be entitled to have the service that we want. NAB has no right to impose their opinion on us. I am not interested in listening to anyone's personal opinions or liberal commentaries. I find XM Satellite radio quite relaxing and informative with weather and traffic with no interruptions for personal comments. Let well enough alone.
